

# What to Do in a Nuclear Emergency?

## Emergency Notification

The government will notify people through different types of media.

Village Broadcast

Radio

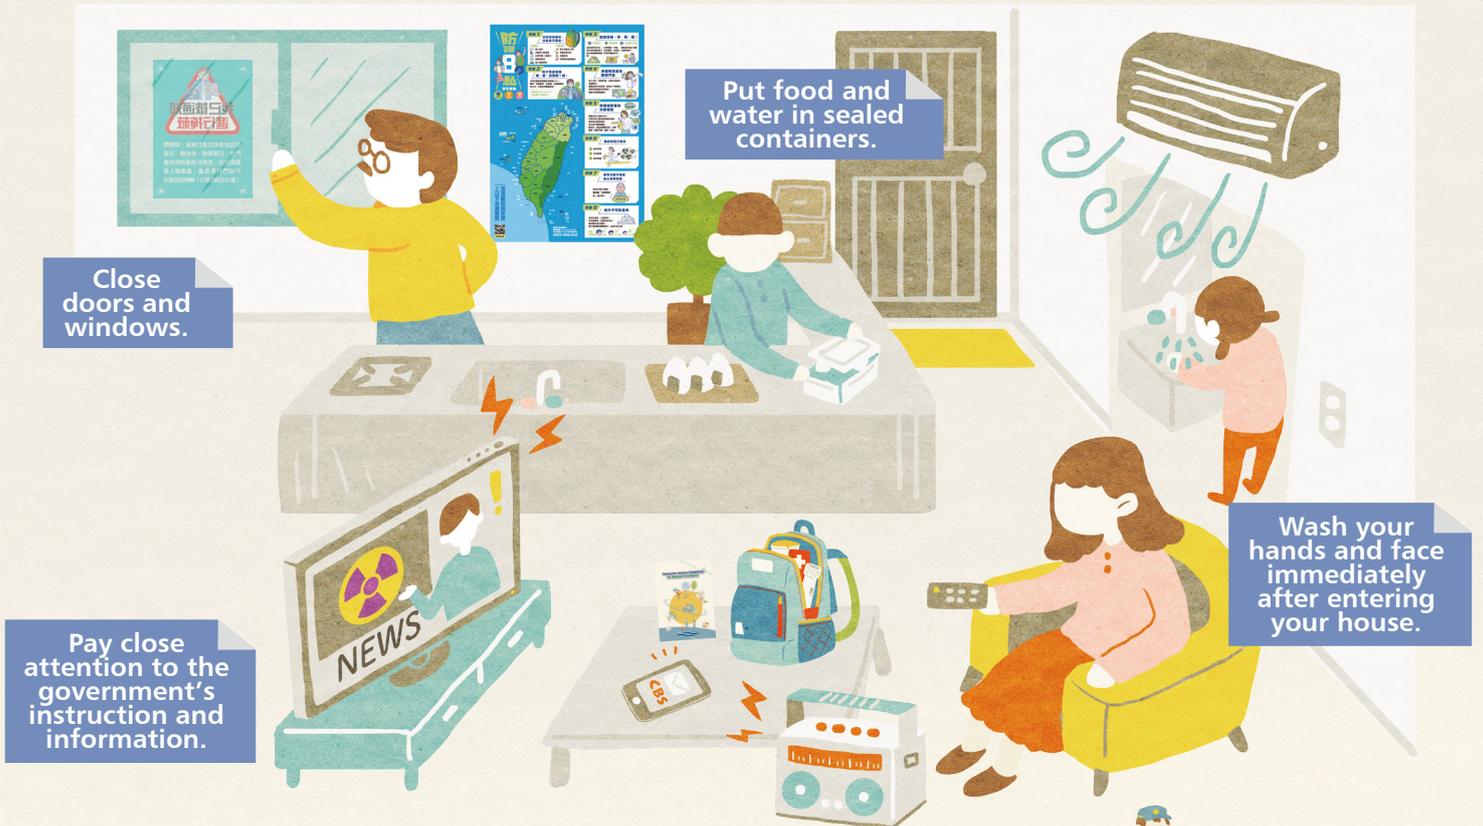

Text Message

Mobile Broadcast

## Shelter In House

# If you are told to Evacuate

Follow the instructions of government and prepare for evacuation.

**Before Leaving Your House**

- Turn Off Natural Gas
- Unplug All Appliances
- Lock All The doors

Paste a sign on window to inform the responders there're physically disabled individuals.

You may leave by your own car.

Please bring me with you!

# Take Iodine Tablets (With the instructions of the government.)

Take the stable iodine in advance, lest the radioactive iodine should accumulate inside body, so that the thyroid is protected.
